

A Evidence infrastructure

Four chain lifecycle data with explicit observation boundaries.

S

Solana | Pump.fun
832,941 complete terminal cohort

B

Base | Clanker
62,618 launch and pool universe

B

BNB Chain | Four.meme
1.59M bounded launch universe

T

TRON | SunPump
104,548 bounded launch universe

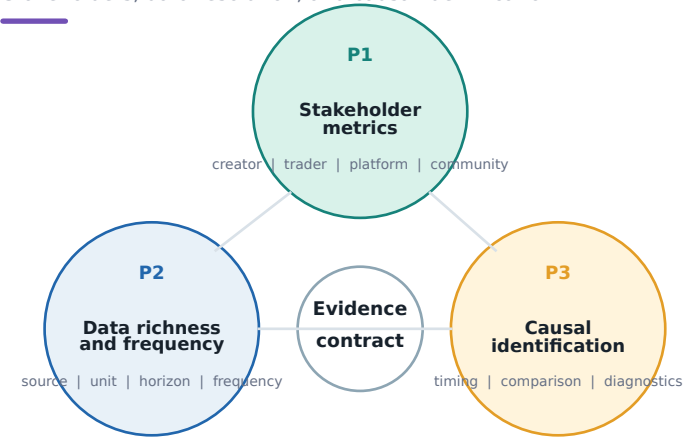

Evidence layers

	Launch	Pool	Outcome	Activity
Solana				
Base				
BNB				
TRON				

Comparable representation does not imply a comparable causal sample

B Three pillar evaluation

Stakeholders, data resolution, and causal identification.

Sequential evidence disclosure

Known truth stress tests

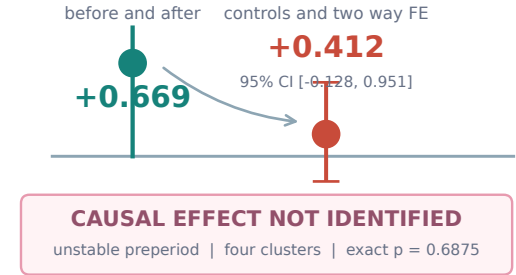

AI

Structured evidence improves evidence following
one model evaluation; method omissions remain

C Evidence calibrated interpretation

Inference narrows activity evidence to bounded stakeholder claims.

Market level estimate

Evidence that remains informative

Operational mechanism

1,636 / 1,651

observed 30 day transaction proxy activity

Predictive marker

+0.945 pp

predictive association; causal exposure not established

Stakeholder interpretation vector

Creator

mechanical

Trader

unresolved

Platform

venue active

Community
